

PLANNING APPLICATIONS COMMITTEE

**ADDENDUM
29th September 2022**

Item

5. ADD to Neighbour Responses

Amended Plans were sent to neighbouring properties on 2nd September 2022, listed in the neighbours notified section of the report.

There have been 3 objections from 3 addresses and 2 objections from objectors where no address was given. The comments are summarised below:

- 1) 15m is twice as high as any other feature
- 2) Medical equipment will be impacted by the 5G radiation
- 3) Visually intrusive
- 4) New siting as bad as the previous siting

There have also been 2 further objections from Nuneaton and Bedworth Community Association. The comments are summarised below:

- 1) Still misleading the public with the application details
- 2) ICNIRP has been proven to be superseded due to a court case and so the radiation will affect people as it is higher than a standard WIFI router
