

# SORRELL ROAD CONCEPT MASTER PLAN

Younger children's play equipment retained and new equipment added. Existing fencing removed and Play space defined by earth mounding and natural features to create a 'Playful Landscape'

Items of play equipment for older children in this area.

A knee rail, wide grass verge and row of trees defines the west and north site perimeters. This boundary treatment is continued along the frontage of Griff Hollows helping to unify the two sites.

Areas of meadow planting

New footpath arrangement provides more direct routes to key parts of the park whilst bypassing the older youth provision and strengthens the connection with Griff Hollows to the south west.

Picnic benches situated under the shade of existing mature trees in a quiet area away from activity.

Outdoor Gym. Connected to main circulation route but separated by planting bed.
