

5-year gypsy and traveller pitches supply

Total Supply

Pitches required within plan period (2016/17 – 2031/32) = 44 (39 residential + 5 transit pitches)

Annual pitch requirement ($44 \div 16$) = 2.75

Five-year pitch requirement (2.75×5) = 13.75

2016/17 – 2020/21 net pitches delivered = 10 (7 at Two trees and 3 at Sunrise Cottages)

2016/17 – 2020/21 shortfall in pitches ($13.75 - 10$) = 3.75.

Applying a 'Liverpool approach'

Shortfall in pitches \div remaining years of plan period (2021/22 – 2031/32) = $3.75 \div 11 = 0.34$

Annual pitch requirement + shortfall in pitches ($2.75 + 0.34$) = 3.1.

Five-year Supply

The five-year supply position for Nuneaton and Bedworth Borough on 1st April 2021 is as follows:

Net supply of pitches in five-year period \div annual requirement applying a 'Liverpool approach' = $10 \div 3.1$;

Nuneaton and Bedworth Borough five-year Gypsy & Traveller supply on 1st April 2021 = 3.2 years.
